

Deleting your GameServer

Should you no longer want or require the VereTech RCE bot, or are dissatisfied with it then removing it is a pretty simple process.

Please Note: If you are a PREMIUM user, you must cancel your premium first before following the steps below using the command `/premium cancel`, for more information on this please [click here](#)

Using the command **/gs delete** you can remove the GameServer at the click of a button below you will see the command as it appears on screen;

A screenshot of a Discord chat interface. On the left is a small orange icon of a person with a speech bubble. To its right is the text `/gs delete` in a light blue font. Further right is a dark grey text input field containing the word `gameserver` in a light blue font. The input field has a thin blue border and a small blue cursor icon at the end.

You will be greeted with the drop down showing all of your connected servers, please select as appropriate to delete the server, if you have multiple then you will need to repeat this process.

Once you have done the above steps, now simply “Kick” the bot from your Discord

Finally please remember to head over to GPortal at <https://www.g-portal.com> to remove the VereTech bot from the permissions of your GPortal Gameserver.
