Introduction into Tip4Serv

Welcome to the the start of seamless automated transactions for your Discord Server.

We have teamed up with Tip4Serv to enable you to set up a store page with a domain of your choice, or one which Tip4Serv will supply, to allow you to point your players to the online store where all translations can be carried out automatically! This means that you will NO LONGER be required to be online when selling items for real life currency!

What is Tip4Serv?

Tip4Serv is a platform designed to help gaming communities, content creators, and server owners monetize their content. It allows users to accept donations, sell digital content, and offer exclusive perks to their community members. Common uses include offering special ranks, in-game content, or Discord privileges to supporters in exchange for financial contributions.

Tip4Serv is particularly popular for managing game servers. It supports a variety of payment methods and offers features like subscription plans, custom domains, and easy setup within minutes!

The service comes with both free and paid plans, with a small fee on transactions. It's frequently used by server owners who want to give supporters access to exclusive content or rewards.

What can Tip4Serv do for me?

Tip4Serv helps server owners by providing tools to monetize their game servers through donations, subscriptions, and exclusive content. Here are some key ways it benefits server owners:

Donations and Subscriptions: Server owners can easily set up a page where their community members can donate or subscribe for exclusive benefits. This helps generate consistent revenue from the server's player base.

Exclusive Content and Roles: Owners can offer rewards like in-game ranks, exclusive content, or special roles on platforms like Discord. These perks encourage players to support the server financially in exchange for added privileges.

Automated Features: The platform integrates with various games and servers, automating processes like assigning roles or distributing content after a payment is made. This reduces the manual workload for server owners.

Customizability and Integration: Tip4Serv supports multiple game servers. It also allows owners to customize their store, payment methods, and even integrate with Discord, making it easy to manage all revenue streams from one place.

These features streamline server monetization, allowing owners to focus on building their community while generating revenue.

Is it free?

Tip4Serv offers both free and paid options. The Starter plan is free, with a 5% transaction fee applied to donations or purchases made through the platform.

For those who need more advanced features, there is a Pro plan, which lowers the transaction fee to 3.8%. The Pro plan also includes additional features such as custom domains, advanced customization, and a 21-day free trial.

This allows server owners to start for free and upgrade if they need more functionality or want to reduce transaction costs.
